My D.A.R.E. Report

Have you ever smoked tobacco? Have you ever chewed tobacco? Have you learned about the effects of tobacco? Did you know tobacco is very harmful? For my D.A.R.E. report I chose to write about tobacco. I have learned about tobacco from my D.A.R.E. officer Trooper Hill.

D.A.R.E is important to me because it teaches me about drugs, tobacco, alcohol, inhalants, marijuana, and peer pressure. All of these things are very bad for you. If you don’t learn about these things you might be affected by them. Some of these things can make you be paralyzed for life. All of these things can hurt you or someone else.

Tobacco can give you cancer. Tobacco can yellow your teeth and give you bad breathe. It can also make you really sick. It can damage your lungs. It can also harm people around you.

Tobacco is the single greatest cause of deaths globally. Tobacco also causes heart attacks and strokes. It also causes mouth cancer. Tobacco use causes 5.2 million deaths. It can also kill you.

I Amber Henson pledge, I will never use tobacco. I will never take drugs. I will never drink alcohol. I will never take inhalants. I will never force anyone into peer pressure.
